

KX-P6500 Laser Printer for Windows

The KX-P6500 Laser Printer from Panasonic captures the ease of use and flexibility of Windows and helps make printing all your documents easier than ever. A dual emulation printer with automatic switching, the KX-P6500 can print documents from any of today's DOS or Windows applications, and is Plug & Play compatible with Windows '95.

And since it receives its print commands directly from the computer this 6 page per minute printer is up to 50% faster than most other traditional entry level printers in its class. Performance gets even better as users upgrade their PCs with additional memory, larger capacity hard disks, and faster processors. The KX-P6500 – great things really do come in small packages!
