# T 1000 LE

**Small enough to take anywhere,  
big enough to use there.**

The Toshiba T 1000 LE has features that put it a class ahead of other notebook computers. It provides the compatibility, storage capacity and small footprint that today's mobile professionals demand. Yet it is big enough in user-friendliness and ergonomics to be a truly useful working companion. The Intel 80C86 processor and 20 MB hard disk give you instant access to all your data and industry-standard applications wherever you are. Yet despite its notebook size, the T 1000 LE can have up to 9 MB internal memory to handle even long and complex spreadsheets or databases. You can choose exactly how big you want your little T 1000 LE to be.

## Human dimensions.

The T 1000 LE's keyboard is designed for adult hands to type on. The highly-acclaimed keyboard layout is designed for familiarity so you won't be continually confusing your keys. The 84 full-size keys have just the right tactile response for easy typing. What's more, with 12 function keys and 8 cursor keys you won't have to learn tiresome new key combinations. Toshiba is committed to making notebook computers truly useful and not shrinking computers just for the sake of miniaturisation.

## Benchmark for display quality.

The T 1000 LE's display is so crisp and clear, you've got to see it to believe it. Thanks to the improved side-lit LCD technology and the high resolution of 640 x 400 dots, the screen is easy to read, even in adverse lighting conditions. You'll find the Toshiba T 1000 LE is one of those rare notebook computers with a screen that is big enough to work at with ease.

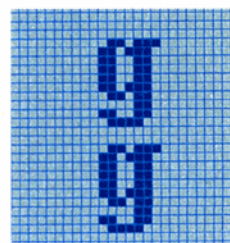

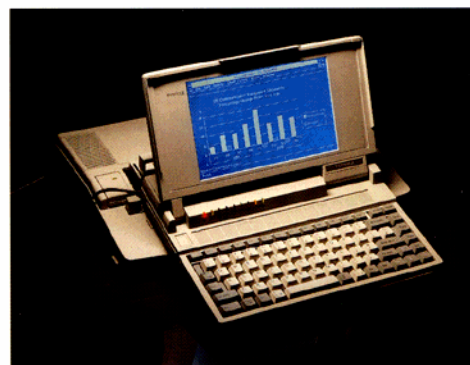

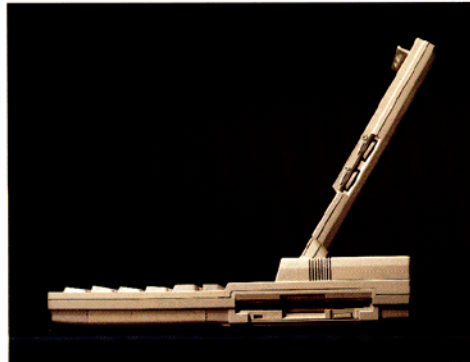

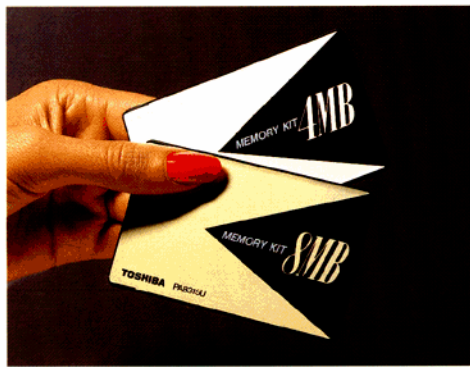

## The notebook with increased expandability.

Add a modem in the T 1000 LE's modem slot, and you open up the wide world of mobile telecommunications. In the office you can connect the T 1000 LE to a Toshiba Desk Station. This enables you to access networks as well as expand your T 1000 LE with industry-standard add-on cards and peripheral devices, putting additional resources at your disposal.

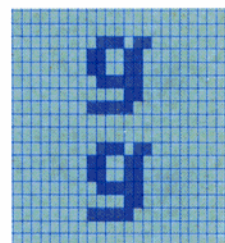

## Extras that make a world of difference.

Like all Toshiba computers, the T 1000 LE is packed with details that have made Toshiba into a world leader. From sophisticated features like removable, rechargeable batteries and AutoResume™ Mode, which gives you a quick start without going through the boot procedure, right through to humble but helpful details like the rubber feet that help you work on slippery surfaces, the T 1000 LE is made with the user in mind. Our leadership in laptops is our prize for this user orientation.
