In Touch with Tomorrow
TOSHIBA

Take it from Toshiba. How are we raising the bar in the notebook mid-range? By packing a Pentium® II processor into our Satellite Pro 490 series – first kid in its class to have one. But this series sets itself apart in other arenas, too. Not surprising, considering both the 490CDT and the 490XCDT come with a 4.1 billion byte hard disk, 32–160 MB EDO RAM and SelectBay modular technology. Now that's what we call high-end. What's more, both Satellite Pro's bear a mid-range price tag. Of course, only at your Toshiba reseller.

The big picture: A must-see debut in this range is the big, 13.3" TFT color screen that graces the Satellite Pro 490XCDT.

Flexibility beyond compare: From CD-ROM to disk drive, from additional hard drive to backup battery: Toshiba SelectBay technology lets you make the switch in seconds.

Good connections: Thanks to Card Station III, you've got a prime link to peripherals and additional slots for PC cards.

A champion with heart: For the very first time in the Satellite Pro range, a Pentium® II processor with MMX™ technology is at the centre of things.
